Prima Vari Mesh

Prima Vari Mesh is becoming increasingly popular as a boundary security fence which looks attractive and acts as a deterrent from intruders. The varying mesh pattern makes it difficult to climb whilst the V beams give the panel its rigidity. The panel is fixed to the post with a steel powder coated clamp to match fencing with a threaded inset and a tamper proof fixing.

Standard heights: 1.8, 2m and 2.4m.

Posts: 60 x60 SHS Set at 3m nominal centres.

Mesh: 6mm horizontal wires and 4mm diameter wires at 200x 5No.20mm apertures and 2No.40mm apertures.

Fixings: Panels fixed to posts with 6No. brackets and threaded inserts and tamper proof fixing.

Finish: Posts Hot Dip Galvanised to BS EN 1461 or Galvanised & Polyester Powder Coated.
